CARDS VALUE

· all face cards (jack, queen, king) are worth 10 points; ·
the ace is worth 1 or 11, at the player's choice;
· the other cards have the value of their figure.

GAME PLAY

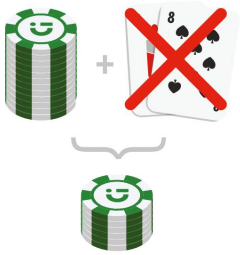
At the start of the game, the dealer deals two cards, face up, to each player and draws one, also face up, for himself.

Then he asks the first player at the table (the player to his left) if he wants to stand or receive one or more additional cards in order to get as close as possible to "21". Then, the dealer plays for him according to a simple and codified rule: "the bank draws at 16, stays at 17".

END OF THE GAME

Whoever does better than the bank wins!

Winners are paid the equivalent of their stake. In the event of a tie, the player keeps their stake.



If his score is higher than 21, we say that the player "busts" and he loses his initial bet.

If the bank finally goes over (exceeds 21), all players still in the running win!

THE "BLACK JACK"

Having 21 in two cards (an ace and a 10, or an ace and a face card) allows the player to be paid one and a half times his bet.

Blackjack trumps any other 21 rolled with more than two cards.

Blackjack is a friendly game where players like to work together, with a single motto: "Every man for himself and everyone against the bank!"
